

FOR THOSE WHO CHOOSE  
**AUTHENTICITY**  
OVER  
**IMITATION**

# OUR STORY

The new era of electronic synthesizers and musical instruments has failed miserably at recreating the richness, complexity, overtones and undertones of a finely crafted musical instrument in the hands of a master.

Likewise, the new era of laboratories' attempt at creating artificial e-liquid flavors and synthetic additives to mimic the rich flavor notes of real tobacco has inevitably been met with failure. Artificial synthetics simply cannot capture the aromatic subtleties, harmonies and very essence found in authentic tobacco leaves.

Whether you are seeking to delight your ears or your taste buds, what is natural is invariably superior to what is artificial. Authenticity endures while imitation falls flat. And Black Note is designed to endure.

Patiently crafted using cold maceration and natural extraction techniques, Black Note is created using small batches of distinct tobacco blends. Real tobacco leaves are at the core, with no artificial flavors, colors, sweeteners or chemical additives. Authenticity is the goal that fuels our passion for tobacco vapor liquid making. Authenticity scores, and wins, every time.

# OUR MISSION

In a perfect world, no one would smoke. But can we make smoking cigarettes a thing of the past? Perhaps.

At Black Note, that is in its purest essence our mission: To help create a smoke free world by providing the most authentic and enjoyable alternative to smoking tobacco.

To do so, we set out to create a vaping liquid that is remarkably different in every way.

# AS CLEAN AS IT GETS

---

## ISO-7 CERTIFIED CLEANROOM

# THE MAKING OF BLACK NOTE

# NATURALLY EXTRACTED

NOT

# ARTIFICIALLY CONCOCTED

Cold macerated, using a 6-8 week proprietary process, known to us as the very best method of extracting aromatic constituents of tobacco.

# TALK IS CHEAP

THE FIRST  
LAB CERTIFIED N.E.T. E-LIQUID

# DOES BLACK NOTE CONTAIN

ANYTHING YOU CAN'T PRONOUNCE

No Diacetyl, Acetyl Propionyl, Acrolein, Acetoin, Ethylene Glycol, Acetone...

# NO CHARACTERIZING FLAVORS

The FDA considers “characterizing flavors” as those that appeal to minors, and such flavors have been banned from cigarettes and their components since September 2009. A special FDA rule prohibits the use of artificial or natural flavors that serve as a characterizing flavor in tobacco products or tobacco smoke. The list includes strawberry, cinnamon, clove, orange, pineapple, vanilla, coconut, licorice, cocoa, chocolate, coffee and cherry. The only exceptions are tobacco and menthol.

Black Note extended that same line of thinking, intentionally avoiding “characterizing flavors” in lieu of a lineup of only tobacco and menthol liquid products.

# NO GUNK FACTOR

Our naturally extracted liquids are “coil friendly,” meaning they do not degrade replaceable coils as rapidly as synthetic e-liquid products on the market. Prolonging the life of your coils translates into a more cost-effective alternative.

# TASTE TOBACCO

NOT ADDITIVES

NO ARTIFICIAL FLAVORS, COLORS,  
SWEETENERS OR CHEMICAL ADDITIVES

# NOW, THAT IS COOL!

Our e-liquids are crafted using a proprietary 'Cold Maceration' method, designed to slowly extract the liquid essence of the tobacco over a span of six to eight weeks - about the same amount of time it took Mozart to complete his final three symphonies. Cold Maceration is known to us as the very best method of extracting delicate tobacco constituents, their aromatics subtleties, their very essence.

# THE NOTEBOOK

We think it is perfectly OK to judge this book by its cover. For those who truly want to have it all, the Notebook provides a harmonious collection of our e-liquid flavors performed on a minor scale. The notes contained within the small yet powerful symphony give you a feel for the variety of distinct flavors that make up the full body of Black Note's work. Each note is composed with the utmost precision, skill and explosive passion that are at the very core of any phenomenal performance.

## CLASSICAL

Contains: 4 (four) 10 ml bottles  
Prelude, Legato, Sonata, Forte

## INSTRUMENTHOL

Contains: 5 (five) 10 ml bottles  
Prelude, Legato, Sonata, Forte, Solo (Menthol)

## PRELUDE

### A Virginia Blend

Grown in the sandy alluvial plains at the foot of the Italian Alps, Prelude's Virginia tobacco derives subtle flavors unique to the Verona soils. Once harvested, the leaves are flue-cured to release their natural sugars and resins, resulting in a light, bright taste and aroma.

Contents: 30 ml  
VG/PG Ratio: 50/50

## FORTE

### A Burley Blend

Cultivated in the fertile volcanic soils around Naples, our burley is ripened by the warm Italian sun before being shade dried and light-air cured. Offering a subtle, slightly sweet flavor, Forte offers the full-bodied flavor and rich vaping experience typical of burley tobacco.

Contents: 30 ml  
VG/PG Ratio: 50/50

## SONATA

### A Cavendish Blend

Originating in the 17th century, Cavendish uses a unique process of cutting and curing designed to bring out the natural sweetness of the tobacco leaf. Sonata uses only fire-cured dark Virginia tobacco, steamed and cured under pressure to allow the rich, robust flavors to fully develop.

Contents: 30 ml  
VG/PG Ratio: 50/50

## LEGATO

### A Kentucky Blend

Planted on the sun-drenched slopes of Tuscany, Italian Kentucky tobacco has an American name and an Italian heart. Flue-cured to release the tobacco's natural resins for a rich-bodied vaping experience, Legato offers a mildly nutty and aromatic flavor with a finish that's both earthy and smooth.

Contents: 30 ml  
VG/PG Ratio: 50/50

## SOLO

### A Menthol Blend

Solo begins with a fine, ultra-smooth Virginia tobacco as its rich, flavorful base, then incorporates a layer of natural menthol oils derived through a special extraction process. The result is a refreshing mint flavor, without the harsh bite, and a bright, cool vaping experience.

Contents: 30 ml  
VG/PG Ratio: 50/50

# QUARTET

## A Latakia Blend

A rare blend with a remarkable flavor, Syrian Latakia is sun-cured and then smoke-cured using aromatic herbs and fragrant woody plants in controlled fires. The result is a peppery, smoky taste that's as robust as it is delicious.

Contents: 30 ml  
VG/PG Ratio: 50/50

### Small Batch

Extracted from an eight-year-old aged Syrian Latakia tobacco lot
